Brussels, February 28<sup>th</sup>, 2018

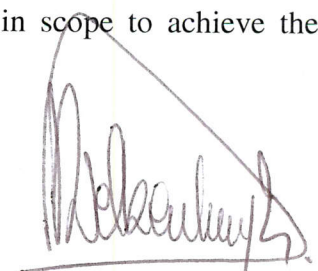

**Subject: Answer to the referral regarding increased liability and stricter requirement on insurance cover for owners of nuclear generating**

ELINI has been given an opportunity to offer its opinion regarding the changes in the Swedish legislation "Atomansvarslagen (1968:45)". ELINI has together with some of their Swedish members in our mutual insurance company agreed on the following answer.

We understand that the suggestion distributed for referral is within the so called "Energiöverenskommelsen" done during 2016. As the required sum insured increases from 300 million special drawing rights to 1000 million special drawing rights ELINI would like to stress that it is essential this requirement comes into force in connection with the annual renewals by January 1<sup>st</sup> when the available capacity in the market can be negotiated and not during an ongoing insurance period.

ELINI will, with its best ability, support its Swedish Members in scope to achieve the new increased liability.

Yours sincerely

**Danny Vanwelkenhuyzen**  
**Managing Director**
